FEATURES:	TECHNOLOGY:	SPECIFICATIONS:
<ul style="list-style-type: none"> <li>• Single button control for ease of use</li> <li>• Small size and low-profile shape</li> <li>• Minimal training required</li> <li>• Works exceptionally well in noisy environments</li> <li>• AA sized batteries are easily changed in the field</li> <li>• High contrast LCD display</li> </ul>	<ul style="list-style-type: none"> <li>• Automatic signal detection eliminates straining to hear weak chirps</li> <li>• Digitally synthesized beep changes in pitch and rate as signal strength changes</li> <li>• Advanced signal processing reduces effects of nearby electrical interference</li> <li>• Signal detection algorithm compatible with all radio transmitters</li> </ul>	<ul style="list-style-type: none"> <li>• Operating frequency: 215.000 to 217.999 MHz</li> <li>• Sensitivity: better than -150 dBm</li> <li>• Dimensions: 15 x 7 x 2 cm (5.9 x 2.7 x 0.8 in)</li> <li>• Battery life: 10 hours</li> <li>• Antenna connector: SMA</li> <li>• Earphone connector: 3.5 mm stereo jack</li> </ul>

**About EyeSpy Innovations:** Founded in 2013, we at EyeSpy Innovations Ltd. are a privately held company, headquartered in Victoria, BC, Canada. Specialists in tracking technologies, we have developed products to continuously monitor the location and trajectory of important individuals, populations at risk, and people with intellectual disabilities who may be prone to wandering or becoming lost. Our devices can also be covertly disguised to track equipment or high-valued assets during overseas shipping and international transport. Used as stationary security units, they can protect and recover valuable merchandise from theft. **For more information, visit [eyespyinnovations.com](http://eyespyinnovations.com)**
