## VantagePoint Options and Accessories

Contact us for latest pricing

### Charging Pad - Available for all products

- Conveniently charge any EyeSpy Innovations tracking device
- Allows devices to remain completely sealed – no external charging ports
- Qi standard for wireless charging

### Magnetic Mount - Available for most products on special request

- Accessory for mounting the device to metal surfaces
- Durable and weatherproof
- Unique rubber petals allow for unlimited magnet arrangements

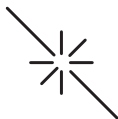

### Radio Beacon - Available for all products

- Allows users to locate their device on foot while using the Loen Ranger
- Useful for pinpointing the exact location of your device
- Works indoors and in areas with no cellular signal
- Acts as a back-up technology against cellular and GPS jammers

### External Power Connector - Available for most products on special request

- Allows users to easily connect an external power supply to the device
- Voltage input range of 6 - 16 V
- Completely weatherproof for outdoor deployments

### Break Wire - Available for most products on special request

- Notifies users when a package or letter has been opened
- SMS and/or email alerts are immediately sent when connecting medium is broken
- Connecting medium is easily installed by the user

### Magnetic Switch - Available for most products on special request

- Forces the device into deep sleep when placed on a magnetic surface
- Useful for situations where tracking is only required when the device is removed from a specific surface
- Greatly enhances battery life for mobile applications

**About EyeSpy Innovations:** Founded in 2013, we at EyeSpy Innovations Ltd. are a privately held company, headquartered in Victoria, BC, Canada. Specialists in tracking technologies, we have developed products to continuously monitor the location and trajectory of important individuals, populations at risk, and people with intellectual disabilities who may be prone to wandering or becoming lost. Our devices can also be covertly disguised to track equipment or high-valued assets during overseas shipping and international transport. Used as stationary security units, they can protect and recover valuable merchandise from theft. **For more information, visit [eyespyinnovations.com](http://eyespyinnovations.com)**
